Profile

I'm a web development student at 1337 School within the esteemed 42 network. I've embraced challenging projects that span months, nurturing my passion for problem-solving. I relish challenges as opportunities for growth and innovation. My goal is to become a skilled front-end developer, creating user-friendly, visually stunning digital interfaces.

PROJECTS

TRANSCENDENCE

- A dynamic web app that reinvents the classic Pong game experience. Challenge friends, make new ones, and engage in thrilling Pong matches on various maps. With integrated chat, a ladder system for competitive play, and the option to queue up for random matchups.
- Technologies used : Typescript, ReactJs, NextJs, Tailwind Css, Css, Socket.io.

WEBSERVER

- Building a custom HTTP server with C++, exploring web technology, like handling HTTP requests, websockets, and different HTTP methods. This project improves C++ skills and help understand how web communication works.
- Technologies used : C++.

INCEPTION

- This project aims to enhance the understanding of system administration by using Docker. Virtualization of several Docker images within a personal virtual machine, providing a practical opportunity to learn about image management and system administration techniques.

EDUCATION

RNCP 6 CERTIFICATE
1337 School
2021 - Ongoing

SPECIALIZED TECHNICIAN IN SOFTWARE DEVELOPMENT
ISGI KHOURIBGA
2017 - 2019

BACCALAUREATE DEGREE
IBN ABDOUN High School
2015 - 2016

SKILLS

- Typescript
- ReactJs
- NextJs
- Html/Css
- Tailwind Css
- Socket.io
- C/C++
- Docker
- Git
